

Dear Friend of Andrea's

This is our first newsletter with a men's focus. We are making a commitment to letting you know what is available for men, as well as still having plenty of treats for the girls.

Yes, men do need hair cuts even if they have very little hair, and there are many more services we are excited to offer the Hawke's Bay Man.

The men's back massage, men's facial, men's pedicure or manicure as well as the fabulous Men's Colour by Redken, that takes just 5 or 10 minutes after your hair cut, to name just a few.

Men's services are of course different to women's, however men can also have hair removal with wax or permanent hair removal with IPL (Intense Pulsed light) which is great for killing the unwanted hair on a man's back or upper shoulders. There are also many specific hair care, styling and skin care products especially for men.

Look Younger with Redken

Your friends won't know, they will just notice you look younger. Redken has created an advanced technology that camouflages and blends in bright white hairs.

It is quick and easy and only takes 5-10 minutes at the basin so no one else knows what you are up to. It fades naturally and is low maintenance.
